#### Water cleansing system.

For the past ten years we have promoted **A1** \_\_\_\_\_ ways to improve health, safety or the environment in a **A2** \_\_\_\_\_ competition. One of the ten 1998 finalists, selected from 195 entries was our refinery scheme for purifying its waste water.

Entirely natural processes are used to create a very efficient water cleansing system. In the final stage water from the refinery enters a **A3** \_\_\_\_\_ created wetland and after flowing slowly through impurity absorbing plants, emerges clean, **A4** \_\_\_\_\_ and bright to rejoin the river.

So successful is the project that 96 **A5** \_\_\_\_\_ of birds have been attracted to the site.

The project is an example of an essential industry and natural processes working together in harmony. What's more it's a popular attraction for the local community, particularly schools.

In fact, this competition **A6** \_\_\_\_\_ to many real benefits for health, safety and the environment and **A7** \_\_\_\_\_ a prize for progress the whole world can share.

A1. 1) inventive 3) innovative

2) new 4) interesting
